

DURABLE, SUSTAINABLE SOLUTION FOR YOUR PACKAGING FLEET

TUFF Series 140L SVR Delivers Robust Packaging for Low-Volume Chemical Shipments

FEATURES AND BENEFITS

- **Rigid & Reliable Strength:** UN/DOT certified Title CFR 49 UN31H1 for Packing Groups II and III regulated and nonregulated materials. The heavy-duty structural frame offers added container protection and reduced rub points on the bottle. Rotationally molded using industrial-grade corrosionfree HDPE for high impact strength.
- **Easy to Use:** Molded-in and inked volume markers are added for approximate product filling and monitoring. The sloped bottom maximizes drainage. The valve area is easily accessible by operators, and TUFF Series totes stack seamlessly with other brands.
- **Cost Efficient & Impact Resistant:** Returnable IBC tanks are constructed for reuse over many years, designed for multiple and repeated turns. Investing in a fleet of asset tanks delivers a higher ROI and reduces waste compared to oneway containers.

SPECIFICATION CHART

MODEL	SIZE	TARE WT
140 Liter	23" x 23" x 36"	28.9 kg

UN/DOT certified, Title CFR 49 UN31H1W, 1.5 specific gravity, measured in gallons and liters. All dimensions and tare weights are approximate.

TUFF LINQ® VALVE

- Integrated cam-lock provides superior seal to prevent leaks
- Patented valve with 30% stronger connection
- Large external threading reduces risk of contamination
